LOCAL ITEMS

The Nazaries held their annual picnic at Collingwood on Wednesday.

August Vanderberg, pupil of the Laughlin School passed his 8th grade examination.

E. O. Hcart has received the appointment of agent for the Pool Elevator Co., at Stanmore.

Mrs. Lloyd Robinson and son, Earl, went to Alaska on Monday, where Earl had his tonsils removed.

Mrs. E. A. Adams, of Hanna, is visiting for a week or two in Chinook, the guest of Mrs. Lawrence Jones.

Mr. and Mrs. F. Bassett left last week to spend their vacation at the home of the former's parents at Huxley, Alberta.

G. Senecal, of Seattle, Wash., an old-timer of Chinook district, is visiting for a short time with his sons south of Chinook.

Misses Marjorie Lee and Dorothy Neff visited for a few days this week with Miss Lee's aunt, Mrs. Rutley, at Kiddersley.

E. E. Jacques and family returned from their vacation at Calgary on Tuesday. They report a very enjoyable holiday in the city.

Mr. and Mrs. W. H. Hurley motored to Edmonton on Tuesday for a short visit. They will also visit in Calgary before their return.

Alvin Robertson, Carl Lee and the Misses Broston motored to Swift Current, Sask., last week to visit friends. They returned home Sunday.

The first instalment of harvesters from Eastern Canada arrived in town last night and will soon be picked up by the farmers for work in the fields.

Mr. and Mrs. W. A. Todd and daughter May left on Saturday by motor for Calgary and Red Deer, where they will visit friends and relatives for two weeks.

Mr. and Mrs. Adam Marr and granddaughter, Edith Marr, of Vancouver, arrived in town on Friday. It is their intention to remain in this district for some time.

The Wednesday afternoon closing for the stores in Chinook for the summer ended yesterday. Hereafter all places of business will remain open on Wednesdays to supply the needs of their customers.

I. W. Deman and son, Alfred, returned home Tuesday morning, after having spent a vacation at Vancouver and in Oregon, where the former visited his daughter, Mrs. Deman will remain in Oregon for a further visit.

Harvest started throughout this district this week, and it is expected that cutting will be quite general next week. Crops to the south and east of Chinook are looking extra good, and so far no hail has touched that part of the district.

Dr. E. A. Braithwaite and wife, Miss Braithwaite and Miss Lyall, of Edmonton, were in Chinook on Sunday last. Dr. Braithwaite is chief coroner of the Province of Alberta and inspector of hospitals and health. He was making a visit at the Cerebral hospital on Saturday, and spent the night and part of Sunday at the Acadia Hotel here before proceeding north.

Heavy Hail

Damage Done

A heavy hail and wind storm struck the district to the north of town at about seven o'clock last Saturday night, doing heavy damage to the crops over a width of six miles and centring on Sound Creek.

The storm swept from Richdale to Saskatoon and the damage runs from 40 to 100 per cent, in the direct path of the storm. In the district to the north of Chinook some crops were completely wiped out, while others suffered in less extent.

The worst sufferers in this district are Burns Orison, Lawrence Bros., W. R. Wright, John Voth and Neil McLean, who were completely hailed out.

T. Sandman, Bert Currie, L. and B. Connor, Mrs. Callahan, F. Foster, Leslie Milligan, Jas. Watson, Len Johnston and J. E. Turner were partially hailed, while Jno. Featherstone and Chas. Perry was touched slightly. The full amount of the damage done or the percentage allowed will not be known until the hail insurance adjusters visit this section and make their report.

Chinook Scholars Make Excellent Marks

Chinook Consolidated School goes "over the top" in fine style this year as regards the results of the departmental examinations. Of the twenty-one pupils of the High School trying the examinations, four failed in one subject, while the most of the students have obtained marks in the 80's and the 90's and several got 100 per cent. in some subjects. The students and the Principal, Mr. Korek, are to be congratulated on the high standard of their work.

Those who were successful in passing in all subjects tried were: Irene Marcy, Audrey Neff, Carol Dumonowski, Ethel Young, Muriel McIntosh, Verna Dressel, Muriel McPherson, Ida Marcy, Madeline Otto, Willie Thompson, Doris Marcy, Dorothy Carter, Vincent Rideout, Lemar Seegar.

Failed in one subject only: Catherine Ferguson, Marvel Milligan, Dorothy Neff, Sadie McLean, Mildred Milligan.

Lyle Begon and Alfred Doman, results not known.

The following pupils were successful in passing the Grade 8 June examinations:

Gladys Wright, Beulah Venard, Mabel Young, Margaret Millican, Elsie Smith and Sidney Demaree.

Mr. Sprictor is a Calgary visitor this week.

Mr. J. Massey and family motored to Calgary this week.

Little Grace McCall of Stettler is visiting her aunt, Mrs. N. D. Stewart.

Mrs. W. S. Butts who has been visiting her parents, Mr. and Mrs. J. Massey, returned to Calgary this week.

Mr. P. Demaree and son returned from Granum where they have been spending a few weeks. They home returned on Tuesday.

Dr. D. Hiestand, retired specialist, is making improvements on his section farm twelve miles south west of Chinook. Mr. Poekens is engaged to do some plowing. Dr. Heistand is the owner of a section 60 miles north east of Edmonton, also some land west of Unity, Sask.

Oyen Young Man Drowned Sunday

The holiday week end was saddened in this district by the death by drowning of Clarence Grippe, 19 years of age, son of Mr. and Mrs. Grippe, who live eight miles south of Oyen, and grandson of Mr. Claus Holten and nephew of Mrs. P. Peterson of Chinook. P. Peterson's family and Mr. Grippe's family motored out to the river last Sunday, a distance of about forty miles, there being three cars in the party. Before leaving for home the young people went into the river for a swim. It appears some of the young men intended swimming across the river, which was only a short distance, and Clarence, who could only swim a very little, followed the others. He suddenly stepped into a deep hole and went down. His friends noticed his danger and at once put forth every effort to save him,

but their efforts were in vain. After searching for about four hours the body was found.

The remains were taken to the home south of Oyen. On Monday there was a service held at the home of Mr. Grippe at two o'clock, after which the funeral service was held at five o'clock, Rev. Mr. Wood, of Oyen, officiating. The burial took place at Oyen cemetery.

The accidental drowning was doubly sad for the parents and relatives, as only three years ago Mr. and Mrs. Grippe lost a son 17 years of age through an accident. The sympathy of the whole community go out to the parents and relatives in their sad bereavement.

Mr. and Mrs. Ward Steckle left last week on a motor trip to Banff, where they intend spending the balance of their vacation before the opening of the fall term of school.

Canada To The Fore

The breaking of records by Canada is becoming a commonplace. It is indeed an off year when, in some branch of human activity and endeavor, this young Dominion does not attract world attention to itself by some new and startling achievement.

Prior to the war, Canada was hardly known, even as a name, to the vast majority of the peoples of Europe, and those who recognized the name had but slight knowledge of the country. To most of the world, Canada was one of the colonies which Britain had scattered here and there over the face of the globe, but which was of little value and of still less importance in world affairs.

In the war Canada made a name for itself, and other nations were suddenly made to realize that there had arisen in the western hemisphere a nation which already was helping to write history in large and impressive characters and was destined to have a profound effect upon international relations, political and economic. Canada's war effort served, perhaps as nothing of a less spectacular nature could have done, to turn the attention of the people of the United States northward, and awaken them to the fact that the whole of North America was not to be found within the confines of the republic; that, on the contrary, a second American power was rapidly developing at their very doors.

Since the war the reality of this fact has year by year been emphasized. Long the world's greatest exporter of wheat, the United States has seen Canada pass it and secure that title by a wide margin. Within the past year or two, the United States has been forced to also relinquish to Canada the distinction of being the world's largest manufacturer of paper. Steadily, year by year, Canada has been passing other countries in the production of gold and is now within measurable distance of overtaking the United States and assuming second place to South Africa.

Contributing a volume of only minor importance to the total trade and commerce of the world a bare generation ago, Canada is now one of the world's greatest traders, a factor to be reckoned with in all the markets of the world. Before the war, dependent upon the money markets of Great Britain and the United States to finance its many undertakings, Canadians today are able not only to finance their own country, but to an ever increasing extent are financing huge undertakings in other countries, while at the same time rapidly buying back into full Canadian control many large corporations of this country which in years of our financial immaturity were financed and controlled by British and United States capitalists.

The war, and Canada's significant participation therein, also had the effect of raising the international status of the Dominion, giving it not only a status of equality with Great Britain within the Empire, but the rank of a nation in the council of nations. The refusal of the United States to join the League of Nations undoubtedly had the effect of the more directly focusing attention upon the North American nation which did join, and placing Canada in the forefront in the League membership.

And since destiny thus called upon Canada to play its part in the international arena, this Dominion assumed the responsibility with dignity and real effectiveness. Its place around the council board at Geneva has been no minor nor insignificant one. Rather, Canada has wielded an influence possibly out of proportion to its present population, but in keeping with the growing importance which other nations now attach to this Dominion.

Having thus moved out into the great international arena, Canada this year decided to be worthily represented at the Olympiad, the great meeting place of the athletes of the world. Despite its small and widely scattered population, this young Dominion dared to try conclusions with the much more numerous representatives of other countries in the field of sport and athletic skill and endurance. And again Canada surprised the world. The sons and daughters of the Dominion carried the flag of Canada to victory time and time again, winning many of the premier events. A Canadian school boy, Percy Williams, of Vancouver, achieved the double victory of winning the 100 metres and the 200 metres race, regarded as classics of the great meet. Ethel Catherwood, a Saskatchewan girl, won the high jump and in doing so established a new world's record. A quartette of Toronto girls also broke the world's record in winning the 400 metres relay race. Considering the number of events in which the Canadians participated, no other country in the world approached their record.

Canada's future is assured when it can produce virile and courageous young men and women of the stamp of its representatives in the Olympic games, and in the hands of such youth its position as a great agricultural, mining and manufacturing country, as a leader in world finance, and as an arbiter in international relations, is assured. Canada is coming into that proud position which Nature through her bountiful endowments intended it should occupy, and if the Canadian people continue to regard each new achievement as an incentive to still greater effort and enterprise, another generation will see their Dominion occupying a world position second to none.

National Radio Chain

Broadcasting Companies To Improve Quality Of Radio Programs

A national chain broadcast organization, divided into two sections, will commence operation about September 1, it was announced in Toronto, by R. W. Ashcroft, who has been appointed manager of the newly formed Trans-Canada Broadcast Company.

Mr. Ashcroft said the organization of the company was the outcome of a suggestion by P. J. A. Cardin, minister of marine and fisheries, that an effort be made by Canadian broadcasting companies to improve the

quality of domestic radio programs.

Key stations of the new organization will be located in Winnipeg and Toronto.

Stations in Montreal, Ottawa, Kingston, Hamilton, London and Quebec, will be linked up with the eastern section and stations in Saskatchewan, Regina, Edmonton, Lethbridge and Vancouver with the western section.

Russia and Peace Pact

Foreign Minister Of Soviet Republic Refers To Failure Of U.S. To Invite Russia To Sign

George Tchitcherine, foreign minister of the Soviet Republic, issued a lengthy statement to the newspapers hinting at the necessity of the Soviet being one of the original participants in Secretary of State Kellogg's anti-war treaty.

Tchitcherine said the United States' failure to invite the Soviet to sign the pact indicated "a desire to make the pact an instrument of isolation and struggle against the Soviet."

The statement asserted that the pact was incapable of preventing wars "because it does not provide for obligatory disarmament."

Charity covers a multitude of sins that should be allowed to remain uncovered.

Will Need Trained Voices

Talking Movies Will Have To Be Pleasing To Audience

The "talking movie" is just now being much talked about. Producers think it will greatly increase attendance on the pictures. That may be so. But it won't unless movie actors and actresses learn to speak as well as to "register emotion."

A voice has as much personality as a face, perhaps more. As long as it is not allowed to interfere with the face, all goes well; but when the face on the screen is fascinating, and the voice uncultivated and feeble, the contrast makes the audience either uncomfortable or amused. Neither state of mind is good for the box office.

Imperial Oil Development

Spending Million Dollars In Improvements To Regina Plant

When two new storage tanks to be built by the Imperial Oil Company for the plant at Regina are completed, the company will have spent something very close to \$1,000,000 in improvements within 12 months.

Last year the company spent \$750,000 in plant equipment. This year a road oil making plant has just been completed at a cost of \$500,000. The two new storage tanks, both of them 120 feet wide, every way by 42 feet high, will cost something like \$150,000.

GIRLS AND WOMEN NEED RICH BLOOD

This Lady Found Dr. Williams' Pink Pills a Friend Indeed

Just because she is a woman there are times when every woman needs help and strength in the form of a blood-building tonic.

To thousands of girls and women Dr. Williams' Pink Pills have proved a blessing because they enrich the blood, give strength and restore tone to the aching nerves. The anaemic girl who is languid and pale, the wife whose back feels like breaking, the matron whose health falls as she reaches middle age—for all such sufferers Dr. Williams' Pink Pills are invaluable because ill-health in girls and women is usually caused by poor blood or insufficient iron. These pills have proved a blessing to thousands of others, why not you? At various stages of life Mrs. G. R. Leake, Waltham, N.S., has proved the value of Dr. Williams' Pink Pills. She says: "I first used these pills when a young girl, for it is during the teenage years when nature calls upon every bit of the reserve strength we have, that we need their rejuvenating help. It was then I found Dr. Williams' Pink Pills a friend indeed. And again, now that the girlhood stage is past and I am a mother of four children, subject to all the cares and worries of the home, Dr. Williams' Pink Pills is the only tonic I take to keep up my health and strength, and they have never failed. Should any ailing girl or weary mother, due to my advice try these pills, I know they will find them as equally good as I have done."

You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Saskatchewan Wheat Pool

The Saskatchewan Wheat Pool report an increase in acreage signed up for the new five year contract period, 1923-1933. They report 85 per cent of the old contract holders signed to date, also a large number of new contracts.

A Remedy For Earache.—To have the earache is to endure torture. The ear is a delicate organ and few care to deal with it, considering it work for a doctor. Dr. Thomas' Electric Oil offers a simple remedy. A few drops upon a piece of lint or medicated cotton and placed in the ear will do much in relieving pain.

First Maid: Your fiancée sluttish quite a bit, doesn't he?

Second Maid: Yes, but it doesn't matter. After we are married he won't have a thing to say, anyway.

HELPED DURING MIDDLE AGE

Woman Praises Lydia E. Pinkham's Vegetable Compound

Sarnia, Ont.—"I am willing to answer letters from other women, to tell them how wonderful good Lydia E. Pinkham's Vegetable Compound did me. I cannot be thankful enough for the benefits I received during the Change of Life. I do housework and my troubles made me unfit to work. A friend advised me to try the Vegetable Compound. I felt great relief at once, began to regain my appetite, and my nerves got better. I will recommend your medicine to all with troubles like I had."—Mrs. JOHN BENSON, 162 N. Christina St., Sarnia, Ontario.

A FRIEND OF THE PRESS

F. E. TRAUTMAN
Press Representative, Canadian Pacific Railway

Newspaper editors and proprietors from the Great Lakes to the Pacific Coast, comprise quite a large fraternity, and to know each and every one individually means a fairly large acquaintanceship. Mr. F. E. Trautman, C.P.R. Press Representative, will possibly tell you that he has more than a nodding acquaintance with all the old-timers and most of the men who have more recently entered the newspaper field in Western Canada. Quite a few years have passed since Mr. Trautman quit the editorial chair of the Fort William Times-Journal, to enter the service of the Canadian Pacific Railway in his present capacity. During the intervening time he has cultivated and held the friendship of the newspaper men throughout Western Canada in particular and Eastern Canada as well. Mr. Trautman's outstanding characteristic is his geniality, and the whole-souled interest he has taken in the welfare of the press is proverbial.

He has been ever present at annual gatherings of the Manitoba, Saskatchewan, and Alberta weekly newspaper associations, and has contributed in his own way, and in a large measure to the success of these conventions.

Miller's Worm Powders, being in demand everywhere, can be got by any chemist's or drug shop, at very small cost. They are a reliable remedy for worm troubles and can be fully relied upon to expel worms from the system and abate the sufferings that worms cause. There are many mothers that rejoice that they found available so effective a remedy for the relief of their children.

He has been ever present at annual gatherings of the Manitoba, Saskatchewan, and Alberta weekly newspaper associations, and has contributed in his own way, and in a large measure to the success of these conventions.

Frown On Reckless Flying

Ban Placed On U.S. Army Airmen Doing Daredevil Stunts At Exhibitions

A ban was placed today on United States army aviators participating in exhibitions of dare devil stunts, such as wing walking and performances of a similar nature.

"This does not, of course, apply to legitimate flying acrobatics at proper altitudes," explained Army Air Secretary Davidson, "but merely to exhibitions such as trapeze work, wing walking, changing from one plane to another in the air, transferring from automobile to airplane and stunts of that character."

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

Deny Responsibility

Reject Charge That Catholic Clergy Responsible For Murder Of Oregon

Bishop Miguel De La Mora, in behalf of the episcopal sub-committee, has issued a statement rejecting the charge that the clergy was responsible for the murder of president-elect Oregon.

He declared the fact that one Catholic priest and one nun were involved in the crime did not mean that the clergy as a body was responsible.

The statement asserted that it was publicly known that the Mother Superior, Concepcion Acebeda De La Lata was mentally deranged and that several cases of insanity have been reported in her family. The mother superior was named by Jose De Leon Toral, the slayer, as having indirectly influenced him.

Secure Grazing Lease

A lease for grazing purposes of 51,807 acres of land northwest of the South Saskatchewan river, has been granted the Home Ranch Company, Ltd., of Bow Island, Alta.

Greyhounds are perhaps the oldest known type of dog. Stone carvings dating back to about 400 B.C. show figures of these graceful animals.

It's more than a problem in geometry to square the eternal triangle.

When a small boy isn't doing anything else he eats something.

FALLING HAIR.

Minard's rubbed into the scalp four times a week arrests falling hair, removes dandruff and promotes growth.

Fur Farming Very Soon To Be A Recognized And Established Western Canadian Industry

Authorities make the prediction that within the next quarter of a century fur farming will be a stabilized industry in Western Canada, accepted and recognized as one of the many phases of agriculture in that territory instead of as a somewhat novel, extraneous activity. The trend in that direction is unmistakable. Farming settlement is extending northward, and, with scientific development having added considerably to the domain of the plow, the tendency to raise furs intensively and domestically will inevitably become more accentuated, and fur farming takes its place alongside the other established activities of that territory. And because this area is by reason of its climate and other conditions capable of producing superior peltry it need fear no rivalry from other countries where the pursuit is similarly developing.

Many branches of fur farming have become soundly established in Western Canada to the extent they have got past the stage of foundation, and are exporting live animals abroad. One of the branches which has received relatively little attention, but which is promised a meteoric development, is that of muskrat and beaver farming, particularly the former. From a position of virtual insignificance in the fur trade this little animal has attained a place of outstanding importance by reason of his pelts' multiplicity of uses. The security of the future of the muskrat industry is held to be the readiness with which the pelt of this little animal can be adapted to imitate the rarer and more valuable peltry. His position is secure as far as can be seen into the future. And while this industry is established in other parts of the Dominion it promises to be one which Western Canada is going to make peculiarly its own.

According to all reports a veritable army of men in the Prairie provinces has been awaiting the completion of arrangements for the transfer of the marshlands and other suitable tracts from the Federal Government to the provinces. There are stated to be 800 applicants waiting in Alberta and hundreds in Saskatchewan and Manitoba. According to announcement these lands are to be leased for fur farming purposes at 25 cents per acre for three years and \$1 per acre for each successive year. There is every indication of wholesale establishment to take place as soon as filing is open.

British Columbia is not lagging behind her prairie sisters, having long since securely established this industry, which is thriving in several suitable sections, and in which it is to be found the world's largest establishment of this nature. The Columbia-Kootenay Valley has come particularly to the fore in this regard and many individuals from adjoining States of the Union have in the past few years moved up to follow the pursuit there. A further addition to such ranches was recently made when a group of Kelowna business men secured a large holding of bottom land from the Columbia Valley Ranches Limited, on the Kootenay Central Branch of the Canadian Pacific Railway, for the purpose of entering upon beaver and muskrat ranching on a large scale. This follows upon three similar fur-farming enterprises to establish in this section.

The industry is one which appeals from many points of view. The land so utilized is largely waste, and unproductive. Operation is economical and to achieve success does not necessitate any great experience or amount of technical knowledge. The

increasing demand for muskrat has elevated prices considerably. These are now fairly stabilized, in the opinion of authorities, who are confident of the industry's ability to produce in the future. The average value of all muskrat sold in Canada at the time of the Government's last fur return was \$15.4, while at recent Montreal sales as high as \$2.70 per pelt has been secured. Ranch-bred pelts naturally bring higher prices, and since large-scale operation is the essence of the muskrat industry it is not difficult to realize the profit which can be made.

Muskrat farming is to become an additional source of revenue in Western Canada from its pursuit as a sole occupation or as a phase of mixed farming. The acquisition of furs in Western Canada has always proved a welcome and convenient means of adding to the year's profits, and this continues even in long settled and established districts, since certain valued fur-bearers tend to increase with settlement. A new industry conferring a double benefit came into existence in Western Canada when it was found that owing to newly discovered tanning processes the native rabbit, which exists there in thousands, could be profitably disposed of. In the past winter one Winnipeg firm alone handled more than 1,500,000 wild rabbit skins, paying for them an average of 10 cents apiece. Furs taken in Western Canada today have an annual value of between \$6,000,000 and \$7,000,000 and the attention being paid to fur farming should have the effect of augmenting this figure.

Canadian Hospitality

New Resident From Old Land Pays Tribute To Kindness Of Canadian People

When he was in the city as a guest of the Chamber of Commerce the other day, Mr. J. W. Chadwick, deputy town clerk at Barrow-in-Furness, England, said: "It is my first visit to Canada, and I assure you my impressions have been very good, especially with respect to the sociability and kindness of the Canadian people."

In an Old Country newspaper there appeared recently a letter from Mr. R. H. Hodgson, two years out from Canada, now a farmer near Manville, Alberta, who said this in part: "We have done fairly well this year; it was our first crop. We had thirty-five acres of wheat in, and we got 1,079 bushels off it, so if we do as well this year we are not afraid of getting on. We were well done by the Canadians when we got here. And if there is time, paint the inside with linseed oil (half boiled, half raw) and the outside with ordinary paint. This seals the pores of the wood and prevents it from swelling and shrinking to such an extent. Creosote preparations are cheaper than the linseed oil, but may taint the staves."

Illustrated signs, showing where politicians may cross busy streets and motorists must give them right-of-way, is one suggestion for "safety-first" being considered by the Paris police.

The way prices are today says the Kitchener Record, about the only time that a person has occasion to ask for change for a quarter is on Sunday morning.

John Henry Mears (left) and C. D. B. Collyer with their mascot, achieved a new globe-girdling record by circling the world in 23 days, 15 hours and 8 seconds, five days less than the previous record.

Some men look for happiness with a lantern when the sun is shining.

Herman Trelle Scores Again

Wins More Honors At Grain Show Held At Regina

Herman Trelle, of Wembley, Peace River District, Alberta, who won the grand championship for both wheat and oats at the International Grain and Hay Show, in 1928, and the grand championship for oats and the reserve grand championship for wheat at the 1927 International Show recently won more high honors at the International Grain Show held in conjunction with the Regina Exhibition. Trelle's winning sample of wheat at Regina was of the Marquis variety, grown on his farm at Wembley, and weighed 88 pounds to the bushel. In the non-competitive exhibits at the Regina show, Trelle had on display a sample of wheat at present is termed his "Mystery" wheat, a variety which he is developing and believed to be a cross between the famous Marquis and a new variety known as Reward, which gives great promise not only for early maturing but for rust resisting, both discoverers of the Canadian Government Experimental Farm at Ottawa.

Herman Trelle is a native of Kendrick, Idaho, and came to Canada with his parents when a young boy. He is a graduate of the University of Alberta.

U.S. May Cut Tariff On Cattle

Hon. Vincent Massey Working In Interests Of Our Stock Raisers

Hon. Vincent Massey, Canadian Minister to Washington, has succeeded in inserting the thin end of the wedge which will open up discussion on the tariff, well-informed traders in Chicago believe.

Their belief centres around the fact that a committee of the United States Tariff Board is about to leave for western Canada to inquire into the cost of cattle production. It is stated that such research is always preliminary to serious consideration of tariff problems.

The theory of the tariff makers, it is pointed out, is that an import tariff must equal differences in cost of production between tariff levying and exporting countries.

Traders on the stock markets are of the opinion that the present tariff affords no protection to American cattle raisers and merely multiplies Canadian growers.

Taking Care Of Silo

Creosote Preparations Better Than Linseed Oil For Sealing Pores Of Wood

This is the season when stave silos go down. The staves shrink in the heat, and at the same time the iron hoops lengthen. Up comes a wind, and in goes the silo. There are two precautions to take. Tighten the lugs if they are not so, so placed that they can easily be reached from the chute. And if there is time, paint the inside with linseed oil (half boiled, half raw) and the outside with ordinary paint. This seals the pores of the wood and prevents it from swelling and shrinking to such an extent. Creosote preparations are cheaper than the linseed oil, but may taint the staves.

Illustrated signs, showing where politicians may cross busy streets and motorists must give them right-of-way, is one suggestion for "safety-first" being considered by the Paris police.

The way prices are today says the Kitchener Record, about the only time that a person has occasion to ask for change for a quarter is on Sunday morning.

AROUND THE WORLD IN RECORD TIME

John Henry Mears (left) and C. D. B. Collyer with their mascot, achieved a new globe-girdling record by circling the world in 23 days, 15 hours and 8 seconds, five days less than the previous record.

Encourage Farm Study

Daughters Of Empire Will Give Bursaries To Quebec Students

To encourage the study of agriculture in the Province of Quebec, the Quebec provincial chapter of the Imperial Order Daughters of the Empire have decided to give two bursaries to students in agriculture, beginning with the academic year 1928-1929. Impartially towards the two races has marked the arrangements as one of the bursaries is set apart for MacDonald College, while the other goes to the agricultural college at St. Anne de la Prochaine, which is entirely French. It has been stipulated that the bursaries, which are for \$200 each, shall be awarded the students taking the highest marks in the final examinations of the second year of the degree course in agriculture. In both colleges there are short courses, but the scholarships of the I.O.D.E. are intended primarily to help students who wish to make a thorough study of the profession.

The Daughters of the Empire have found that very little was being done in Quebec to encourage the study of farming in an up-to-date and scientific manner, it was stated. As their policy is patriotic and educational, it seemed thoroughly fitting that the bursaries be given at the present time for agriculture, in order to show the interest of the Daughters of the Empire in all phases of their country's welfare.

Fall Ploughing Sod For Corn

Should Be Planned Soon As Possible After Removal Of Hay Crop

Sod land to be put into corn next year according to tests made at the Experimental Farm, Ottawa, should be ploughed as soon as possible after the hay crop has been removed. This is particularly recommended for weedy land, which should be worked frequently after the ploughing until late in October when it should again be ploughed and left rough over winter. According to the report of the Dominion Field Husbandman for 1927, published by the Department of Agriculture, Ottawa, this practice may not necessarily increase the yield of late fall over spring ploughing, but it lessens the work of weed eradication. While the second ploughing may in the case of light soil be left until spring when the weeds have been pretty well controlled, it is much better, under all conditions according to this report, in the case of clay soil to do the second ploughing in the autumn.

Apple Crop Is Promising

Twelve Per Cent. Better Crop Forecasted For This Year

The Dominion's Department of Agriculture forecasts a 12 per cent. better commercial apple crop this year than last. The estimate is 3,157,380 barrels as compared with 2,810,600 last year, and an average of 3,105,500 for the five year period, 1923-27. The increase is in the main attributable to the British Columbia crop which is estimated at 1,433,200 barrels, as compared with 1,079,500 barrels in 1927 and a five year average of 1,069,270 barrels.

Mrs. Mosher—"One thing, my husband and I never do any quarrelling at the breakfast table."

Mrs. Squabbe—"That's right. I have seen your man eating his breakfast down street."

The average time taken by blood to circulate from one arm to the other is 18 seconds. It makes the round trip three and a third times a minute.

Greatest Ranching Areas On The North American Continent Are To Be Found In The West

Tobacco Expert For Canada

Canadian Government Paying Special Attention To This Growing Industry

Nels T. Nelson, B.S.A., has been appointed to the position of Chief of the Tobacco Division of the Canadian Government. Dr. Nelson has been tobacco expert for the past four years at Windsor, Connecticut, U.S.A. After graduating from the University of Wisconsin, he was appointed to the staff of that University and in 1919-20 worked on tobacco diseases under Dr. Johnson, a leading tobacco expert in the United States. From 1921 to 1923 Dr. Nelson was assistant in agronomy at the university, and for the past four years has given special attention to tobacco fertilizer, curing, improvement of varieties, etc.

The rapid increase in tobacco production in Canada, which has increased from 13,000,000 pounds in 1921, to approximately 46,000,000 pounds in 1927, is causing the Canadian Government to pay special attention to this growing industry.

British Boys Arrive

Party Of Young Men To Study Farming Methods In Prince Albert District

Eleven British boys and young men, part of a group of 100 immigrants from the old country, landed in Prince Albert recently, and were taken in charge by the land settlement board to be placed on farms in the district.

The settlement board will keep a record of each man for the next five years. They are all well equipped, and have completed a course of instruction in England at either the Brandon or Claydon farm colleges with a view to settlement on farms in Western Canada.

Country

Political economists in the United States are now beginning to realize the importance of Canada's food producing possibilities. Not only is the home population continually increasing, but the extension of its cultivated land is gradually contracting the vast open spaces once available for free stock ranges. The recent drop on Canada's beef and dairy cattle to replenish the depleted United States herds is more likely to increase than diminish, judging from the estimates of the situation appearing in newspapers south of the line. In the last fiscal year Canada exported 288,021 head of cattle, worth \$13,877,405, figures exceeded only in 1919, 1920 and 1921. A recent Canadian Pacific bulletin on ranching in Canada states that Canada's cattle have been moving across the border at prices which are returning to their producers the greatest profits ever received, and the prospect is that this situation will continue for some time. It goes on to point out that any possible surplus above United States requirements should find an outlet through the British Isles and, probably, Japan, the latter country having recently taken several shipments of Alberta cattle.

The bulletin has attracted attention in the United States, more particularly its statement that south of the main line of the railway, in the provinces of Saskatchewan and Alberta alone, are more than 5,000,000 acres of leased range land where giant herds of horses, cattle and sheep roam the prairies pasturing on the rich grasses as they did in the area's earliest stage of development, and where by reason of conditions they will probably always continue to do so. Within the railway belt of British Columbia are over 6,000,000 acres of leases, the number of leases and the area comprised steadily increasing. A direct impetus to the ranching industry was recently given by the Department of the Interior in an amendment, when it allowed the granting of 21-year leases.

This region has long been established as one of the greatest ranching areas on the North American continent, but it does not represent more than a relatively moderate proportion of the available country. Other sections of the Canadian West offer equal opportunities for raising of live stock on an extensive scale. Much interest is being taken in the Peace River tract of Northern Alberta and the valleys of the interior of British Columbia. In the vast region of the Peace River are large tracts of good grazing land suitable for ranching, the bright prospect facing the industry at the present time, enticing many to that territory. Again, in the interior of the Pacific coast province are excellent stretches of range country, capable of carrying great herds of live stock. The establishment of new enterprises and the importation of numerous animals are continually being reported, the bulletin announces.

Canada's Highest Officer

The highest official in British Columbia is the fire ranger occupying a lookout station on Mount Carter in the Revelstoke District of British Columbia, 9,000 feet above sea level. Even in summer weather he obtains his water supply from snow. From his exalted station this ranger guards an area containing 130,000,000,000 feet of British Columbia timber.

In racing a horse's age is reckoned from the January of the year in which it was born; thus a horse born in December, and actually not a month old the following January would officially be a year old.

The longest sleep on record was that of a French woman, the "Sleep-er of Thionville," for seventeen years. It was caused by mental shock.

"Is that bottle of rum your sole consolation?"

"Oh, no. I have two more in the cupboard!"—Pete Mele, Paris.

"He has an illness the doctor does not understand. He can eat and drink as well as ever—but he cannot work. I don't call that an illness, I call it a gift from Heaven."—Sondagins-Strik, Stockholm.

Why is Red Rose Tea so fresh and flavory? The answer is that it is a blend of the choicest, juiciest leaves, picked when only ten days old—and sold by your grocer in clean, bright aluminum. No tea can be expected to retain its richness and strength unless packed in this modern metal container—the only package worthy of Red Rose quality.

WORLD HAPPENINGS BRIEFLY TOLD

Henry J. Wright, K.C., 66, prominent Toronto barrister, is dead.

The London Sketch says that Oscar Slater, whose conviction of murder was recently set aside after he had been imprisoned for years, has accepted the government's offer of \$5,000 (\$30,000) as compensation for his wrongful conviction.

Rev. Father James Hunlin, former rector of St. Michael's, London, Ont., and St. Joseph's, Brantford, was killed when he wandered on the C.N.R. tracks near his home. He retired a few years ago and was in poor health.

Senator Dale, of Vermont, announced that President Coolidge had expressed his certainty that Herbert Hoover would be the next president of the United States. The Senator said that the chief executive had given expression to that view during a conversation.

Practical certainty that Charles Evans Hughes, of the United States, will be elected at the September meeting of the League of Nations, a member of the Permanent Court of International Justice at The Hague, came recently, when Italy and Poland joined the 26 nations who previously had nominated him for the place.

The first appointment of its kind to be made in Canada is that recently made by which Miss Lillian Hollinghead, a graduate of the University of Saskatchewan, will become a member of the staff of the Dominion rust laboratory in Winnipeg, her duties to begin next Spring. Miss Hollinghead is now at the University of California.

F. W. Harris, of Birmingham, England, wrote to Mayor Norman, of Saskatoon, some time ago and asked him aid in locating a brother who had left England for Saskatchewan 15 years ago, and had not been heard of since. An item was inserted in the Star-Phoenix and a reply was received from A. E. Harris, Dundurn, Sask., who stated he was the long lost brother.

DIARRHOEA Was So Bad Child Passed Blood

Mrs. Harry Nesbitt, R. R. No. 9, Shannon, N.B., writes:—"Last Fall my little boy took very bad with diarrhoea, and before I knew it he was passing blood. I went to our medicine case and gave him a dose of

and a little later gave him another, and half an hour after the second dose he got relief and by the time he had taken six doses he was like a different child."

This wonderful bowel complaint remedy has been on the market for over 80 years; put up only by The F. M. Milburn Co., Limited, Toronto, Ont.

Farmers' Marketing Tour

Canadian National Railways' Tour To Great Britain and Denmark, 1923

(Continued.)

Having seen Impington Hall, once the home of Samuel Pepys, a three hours' run took us to Nottingham. En route we Huntingdon, the birthplace of Oliver Cromwell, Peterborough, with its cathedral, and a 1113—here Catherine of Aragon was buried, and for some time the body of Mary, Queen of Scots, lay; Stamford, sacked by the Lancastrians in 1461; Oakham, where every traveller was required at one time to leave a horseshoe at the castle, the earliest of the present collection being contributed by Queen Elizabeth; and Melton Mowbray, famous for its pork pies. Still on cheese and for hunting.

Our stay in Nottingham was for the night only. By 8.30 a.m. we were on our way to Newcastle, passing through Oulton on the Great Central, Sherwood Forest, of Robin Hood fame; Doncaster, of the races and butterscotch; Selby, with its Abbey built by William the Conqueror; York; Darlington, the birthplace of the modern railway, and Durham whose cathedral, one of the most dominantly situated in England, is acknowledged the grandest Norman cathedral in the country.

Lancaster York gave us opportunity to visit York Minster, to view the city walls. History is not merely evidenced but felt in York. Here died the Roman emperor Severus in the year 211. Here the son of Constantine the Great was proclaimed Emperor of Rome in 306. From their base in York the Romans conducted more than one campaign. In Saxons times York was a torchlight of Christianity. Last year the Romans celebrated the 1300th anniversary of the founding of York Minster.

Amazement filled our minds as we entered this glorious building, lofty and more magnificently spacious than any cathedral we had seen from floor to roof 99 feet sheer; 102 feet in the choir. The tallest tower, the second largest in the world, is 75 feet by 32 feet. The stained glass is the most perfect and extensive in Britain. The choir is the most beautiful in England. It is believed that the pagan temple of Diana stood on the site of the choir. Here the feast on King Edwin ended in Christianity and in the crypt we saw the wall from which he was baptised. How wonderful then the great cathedral within this venerable Minster the names of Canadian women! We found that the names of the panels below the five Sisters of the Rosters were recently restored, and unveiled by the Duchess of York to the memory of the five Canadian women who died in the Great War. The Canadian names numbered 42.

One could not leave Yorkshire without a tribute to the goodness of its farming, the neatness and thriftiness that characterize this county of "broad acres." The reputation of Yorkshire farming excels anything we had seen.

Nowhere was it better seen than at the home of Mr. J. J. Strickland, Balnesa, Catterick, one of the most outstanding breeders of dual-purpose thoroughbreds in England. Today, by his courtesy some thirty of our party were enabled to see his herd and enjoy the hospitality of his home. As we rode on north we passed through the historic ground where the Short-horn breed had its beginnings, and it was interesting to see over Mr. Strickland's manse the picture of one of his ancestors who sold cattle to Amos Cruickshank.

As we passed through Darlington, we stopped in the famous old market place, the scene of historic contests and animated discussions on the relative merits of the cattle of various old-time founders of the Short-horn breed.

Newcastle, like Nottingham, was reached in the evening, and early in the morning, so we had not time to view this busy city. Suffice it to say that we were impressed by its activity and the signs of the hand of its industrial and maritime importance.

The journey towards the Scottish border was through beautiful and increasingly hilly country, becoming wilder and more magnificent as we approached the Cheviots. A stretch of wire running to the top of a sugar loaf hill and a board marked "SCOTLAND" told us that we had reached the border. Cheers broke out as each char-a-banc crossed it—our salute to "Caledonia, stern and wild!" Soon, however, the stern beauties of the Cheviots gave place to a kinder prospect. Hard to believe that we were passing through the battlefield of Chevy Chase where the forces of Hotspur fought the troops of Douglas by moonlight 540 years ago.

We lunched at Melrose which boasts in Melrose Abbey, the finest ruin in Scotland, founded by the Cistercians in 1136, but destroyed, rebuilt and extended at various times. The ruins are principally those of the 14th century. Near the High Altar, the heart of King Robert the Bruce, is said to have been buried.

We had now a solemn duty to perform, a sad tribute to pay. We had been shocked while in Denmark to learn of the sudden death of Earl Haig. The funeral had taken place before our return to England, but Dryburgh Abbey was one of those places which we were to see en route to Edinburgh. What more natural than that we should wish to pay a tribute for ourselves and Canada at the last resting place of the great Field Marshal. We had brought with us a wreath of poppies, obtained from the British Legion, that body of ex-service men for whom the late Earl had done so much. It was late in the afternoon when we reached Dryburgh Abbey, and the setting sun was shining through the trees. In this sheltered spot, quiet as in the

days when monks had meditated there, the world seemed far away. We felt the peace of Dryburgh unfold us as we formed up silently to march in procession to the simple grave. Mrs. Matheson carried the wreath. Reverently it was deposited, reverent we stood and lingered. We were still silent when we moved away. A high privilege had fallen to our lot, a deep experience.

(To Be Continued.)

War On Crows

Saskatchewan's Crow Population Is Materially Reduced

Saskatchewan's crow population has been reduced by more than 50,000, and 154,159 eggs have been destroyed in the competition promoted by the provincial department of railways, labor and industries, according to the official returns up to the beginning of August. To date, 1,595 competitors have enrolled in the competition.

Competitors certificates account for 112,757 crows' legs, or 56,376 crows, and 154,159 crows' eggs.

Anton, Galgan, Dana, is leading with 149 eggs and 2,054 legs, for a total of 10,592 marks; Horace Cowling, Semans, is second with 1,293 eggs, and 1,380 legs, for a total of 9,418 marks, while Rudolph Lenizack, Neudorf, is third with 491 eggs, and 1,664 legs for a total of 9,302 marks.

Would Remit Customs Duty

Grade Ewes and Pure Bred Rambouillet Rams From U.S. To Enter

Free For Certain Period

An order-in-council has been passed providing for the remission of customs duty on grade ewes and pure bred unregistered Rambouillet rams imported from the United States during the period commencing September 1st and ending November 30th. These sheep are imported for breeding purposes, and must conform to all regulations as to health and be subject to all quarantine orders. The supply of these classes of sheep in Canada is not sufficient to meet the demand, and a large quantity is available in the United States for export. Similar action has been taken during the past few years on recommendation of the Minister of Agriculture.

Winnipeg Newspaper Union

The women's division increases in interest with the entry of Ethel Herlie, the best woman last year; Ethel de Biebre, an American Olympic champion in 1924; Lucy Dimond, of marathon fame; Lottie Schmechel, who created the grease suit and others probably even better known whose names must, in confidence, not be mentioned until the last moment.

An Easily Fashioned Apron

The smart apron shown here is cut in one piece and has a V-shaped neck. The back laps over the front under the arms and there are two useful patch pockets. Unbleached muslin, gingham, chambray, cretonne or percale are suitable materials for fashioning this apron, and a note of contrast may be introduced in the binding, as illustrated. No. 1710 is in sizes 36, 40 and 44 inches bust. Size 40 requires 2½ yards 32 or 36-inch material. Price 25 cents the pattern.

Our Fashion Book, illustrating the newest and most practical style, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

THIRD WRIGLEY MARATHON

Only One Swimmer In West Has Entered the Big Swim

Surprising as it may seem, to date only one entry has been received by the Exhibition authorities for the Third Wrigley Marathon from Western Canada—that of John Patrick Smythe, of Saskatoon, and sent in from Moose Jaw. However, John Patrick is an easterner, when it comes to swimming, as he long ago was a member of the Toronto Swimming Club, and learned most of his swimming there. He doesn't say where he does his training, but he will establish himself on the banks of Lake Ontario, a short week before the race.

Fred Crowe, of Fort William, is the next nearest approach to a western entry, who up to now will be a competitor. Fred should have no trouble in negotiating the southern waters of Lake Ontario, when it is considered that he has been navigating the Kaministiquia for three months in preparation for the big grid,—although Lake Ontario has not been warmer than fifty degrees Fahrenheit for the past month.

Armenia represented; Holland has three; Poland, one; Australia, two; Germany, four; Switzerland, two; France, four; England, two; Finland, three; Norway, two; South Africa, one; Dutch East Indies, one; Hawaii, one; Belgium, one; the United States and Eastern Canada sends scores,—yet the west has only one to "chance his arm."

George Michel is now in Canada, and in hard training near Quebec. Vierklooster does his daily dozen in Humber Bay. George Young, after a vigorous scrap with his management in which he capitulated, is still at Port Credit, where he attracts many to his camp. "Flying Fish" Summers of California, is looked on as almost a sure thing this year. He has improved his stroke to a remarkable degree, now swimming a flutter kick that seems to add miles and miles to his speed. But mendell Burditt, former Winnipeg boy, a clerk in the Canadian National Railway head office, is not to be overlooked, and there are numerous swim-wise fans who are loud in their praise of him. Others say he is overdoing it and may be too fat for the day of the race. Four or five miles a day for weeks on end will ensure any swimmer to scrap in time.

The women's division increases in interest with the entry of Ethel Herlie, the best woman last year; Ethel de Biebre, an American Olympic champion in 1924; Lucy Dimond, of marathon fame; Lottie Schmechel, who created the grease suit and others probably even better known whose names must, in confidence, not be mentioned until the last moment.

Recipes For This Week

(By Betty Barclay)

NUT AND DATE BREAD

2 cups flour.
½ cup sugar.
1 teaspoon salt.

1½ cups Graham flour.
4 teaspoons baking powder.

1½ cups milk.
3 tablespoons melted butter.

2-3 cup nuts.
1 cup dates, chopped.

Mix and sift together dry ingredients, add milk, butter, dates and nuts last. When well mixed, place in a well-buttered bread or loaf-cake pan. Let stand for 20 minutes. Bake in a moderate oven 45 minutes.

CREAM OF VEGETABLE SOUP

1-3 cup finely chopped pork or

1 medium diced onion.
1½ cups diced potato.

¾ cup diced carrots.
1 medium green pepper, chopped, or

1 tablespoon chopped parsley.
1 cup diced turnip.

Cook vegetables and pork until tender in just enough water to cover. Add this mixture of vegetables and water to 4 cups thin cream soup (4 cups milk, 4 tablespoons flour, 4 tablespoons butter). Season to taste and serve hot.

Vegetables may be browned with bacon or pork in a frying pan before boiling—this gives a different flavor.

This soup, together with whole wheat bread and butter and a simple dessert, is sufficient for a whole meal.

Knew His Subjects

Two colored men came to the outside of a crowd where a politician was making a speech. "Who am I, Sam?" asked one. "Ah doan know what his name is," Sam replied, "but he sure do recommen' hisself most' highly."—Vancouver Province.

It would seem to be a poor newspaper article when you cannot make head or tail of it.

SUNDAY SCHOOL LESSON Faith In The Wheat Pool

AUGUST 19

PAUL CARRIES THE GOSPEL INTO EUROPE

Golden Text: "Come over into Macedonia and help us."—Acts 18:9. Lesson: Acts 15:36; 16:15. Devotional Reading: Isaiah 60:1-6.

Explanations and Comments

The Macedonian Call, verses 9, 10. Paul was in Thessalonica, the gateway to Europe. As he walked the streets he saw a motley crowd, among them many Europeans. As he stood in the harbor and gazed out at the distant islands fringing the coast of Macedonia, he must have longed to go over and possess that part of the world for Christ. It was a natural vision which appeared to Paul that night, of a man of Macedonia standing before him and begging him to "Come over into Macedonia and help us."

"There was that mighty power which has been called the 'urge of God' acting upon a soul ready to obey the divine behest to the uttermost."

"How came the vision to take this shape—a Macedonian beseeching him? Perhaps because an active imagination tends always to personify human need. Phillips Brooks once said to a friend that sometimes, as he preached in Trinity Church, the multitude of faces in the congregation, expressing their multitudinous hunger and yearning, would suddenly melt into a composite face, all the people becoming for the moment a single person whose want need moved the preacher profoundly, and to whom he poured out his secret soul in impassioned utterance. It may have been thus with Paul and the Macedonians. His eager yearning to help would not permit him to think of them generally as a collection of individuals, but only as a composite personality whose need was so acute that a way must be found to help them. It is the success of the missionary enterprise always will depend upon the power of Christians to visualize and personify the need of non-Christians in this way."—James A. Beebe.

"I am confident that when the Almighty wants us to do, or not to do, a particular thing, he finds a way of letting me know."—Lincoln.

What was bidding him preach in Macedonia? Paul believed, and "straightaway" he made his plans to obey his orders.

Very old men, W. Robertson Nicol, thinks, look back with regret upon the decisions that they made at the crises of their careers, and the reason is, he says, that we are not left so much to our own wisdom as we think. All unconsciously to ourselves we have been guided.

Need Hardy Pioneers

London Paper Says Canada a Country Mainly Fit For Heroes To Live In

Discussing the assertion credited to Ramsay MacDonald, in Quebec, to the effect that Canada wanted only the cream of immigrants, the London Evening News says editorially: "What fools the Canadians would be if they welcomed derelicts. We may pass over the fact that all of Canada save the fortunately well-populated section of lower Ontario and a strip of British Columbia coast is a country fit mainly for heroes to live in. Our Canadian brothers would not wish to stress this aspect of migration too severely, but we must say without hurting sensitive feelings that the hardy Scot from the Orkneys or Western Isles has a better chance of becoming one of Canada's leading citizens than a product of some town slum."

"Canada's answer to MacDonald will be 'Keep your derelicts, or better still, stop them becoming derelicts,' the newspaper concludes."

Coals To Newcastle

Modern Counterpart Of Old Adage In Shipment Of Wheat To Russia

The old adage about shipping coals to Newcastle has a modern counterpart in the shipment of about \$5,000,000 worth of Canadian wheat to Russia, which went forward from Montreal recently.

Before the war Canada's greatest competitor in the wheat markets of the world was Russia, but conditions have changed that, not only in Canada now the world's greatest wheat exporter, but she is actually shipping wheat to Russia. The shipments are said to be necessary to meet a threatened food shortage in Russia.

Radium is the most costly metal in the world.

When a man is generous to a fault it is usually to one of his own faults.

Larkins: "But think of the old days, the galley slaves, for instance." Sparkes: "Well, all they had to do was row a boat and they had plenty of help, too."

The writer's train of thought is a construction train.

"Now, just tell me how you came to have these pains."—Jugend, Munich.

SEES NO SIGNS OF DECADENCE IN BRITISH EMPIRE

London, Eng.—"I am going back better pleased than ever that I am a British citizen," declared Premier G. Howard Ferguson, of Ontario, to the Canadian Press, before his departure for Canada.

Premier Ferguson has been in Britain and Europe studying migration possibilities, educational systems and agriculture since early in June.

"The man is a fool who says the old country is decadent," Premier Ferguson said.

"Like every other country in the war, England lost a generation of the brightest and most promising men who were on the threshold of business or public life. The still younger group who were then below military age are now coming on. The next ten years ought to be the most striking in the whole history of Empire development."

The premier said he found conditions in Scotland and Ireland greatly improved.

Speaking of agriculture in Britain, Premier Ferguson said that an all-round good crop meant ultimate prosperity.

"I can see a distinct advance everywhere in interest in overseas," the premier declared. "The pressure of the unemployment problem will bring of itself a greater consolidation of Imperial sentiment and imperial forces generally."

Ontario Wheat Pool

Meets With Good Success After One Year's Operation

Chatham, Ont.—In one year of operation the Ontario Grain Pool has proven an outstanding success and, according to present indications, greater things will be achieved in the next year. The farmers have been educated to realize the benefits of co-operative marketing, and they are getting solidly behind the pool movement in Ontario. These facts were brought out at a meeting here, when the pool's affairs, past and present, were discussed.

The speakers were Colin H. Burnett, Winnipeg, president of the Manitoba Wheat Pool, and H. A. Gilroy, Alvinston, president of the United Farmers of Ontario Co-Operative Company. David L. McCreary, Wallaceburg, Kent County representative on the Ontario pool directorate, acted as chairman, and at the close of the morning meeting was unanimously re-elected to the governing board of the pool.

Mr. Gilroy told of the remarkable progress made by the pool movement in Ontario in a year, during which time hundreds of five-year contracts had been signed. He was assured by observation throughout the grain-growing areas that the growers were becoming convinced of the soundness of co-operative marketing and would join the pool in greater numbers during the next twelve months.

Unable To Visit Canada

Ottawa.—Information has reached the Government here that Lord Hailsham, who will act as Prime Minister of Great Britain in the absence of Rt. Hon. Stanley Baldwin, will not now come to Canada with the Empire Parliamentary Union, which is expected to arrive here the last week of August.

Noble Submits Report

Rome.—Premier Mussolini has received General Umberto Nobile, who presented to him his first report of the Italia disaster. The Italian premier, sometime ago informed the cabinet that a complete investigation would be made into all phases of the loss of the North Pole dirigible.

Given Farewell Luncheon

Winnipeg.—Dr. R. C. Wallace, who soon will assume the presidency of the University of Alberta, was tendered a farewell luncheon by members of Manitoba Mining Associations. A presentation was made Dr. Wallace by Col. H. F. Osler.

Vesuvius In Eruption

Naples, Italy.—The volcano Mount Vesuvius is in eruption, the clouds of smoke and lava being visible for 25 miles. A cordon of troops has been established about the base to keep tourists from the danger zone.

Respect For Flag

Kingston, Ont.—Ontario branch Canadian Legion, in convention here, condemned the use of the Union Jack to drape desks at meetings, etc., and would have it used only as a flag.

W. N. U. 1746

Italian Submarine Disaster

Twenty-Seven Of Crew Perish In The Tragedy

Rome.—Poisoned by acid fumes or choked in the first rush of water, the crew of the Italian submarine P-14, sunk in a collision in the upper Adriatic, died to a man at their posts apparently with fortitude and resignation.

The stricken submarine was raised to the surface after 34 hours of desperate labor by divers who worked hour after hour to attach an air-pipe to the sunken vessel and to fasten steel cables in order that she might be lifted to the surface.

Twenty-seven perished in the tragedy. First reports received by the naval authorities indicated that there were 31 men aboard, but a check of the bodies today revealed that four of the crew had remained ashore for reasons which have not yet been ascertained. Included in the victims were two officers, Captain Well and Commander Fasulo.

Captain Well and Commander Fasulo were both at their posts of command in the compelling moment when the remaining members of the crew were all found dead at their stations. There were no visible signs of panic aboard the boat.

Pilgrims At Ypres

Impressive Ceremony Is Held In Which 11,000 British Veterans Participated

Ypres, Belgium.—Eleven thousand British veterans of the Great War, including 3,000 women who served in various capacities during those four terrible years, gathered about Menin Gate on Aug. 8th for a solemn ceremony in commemoration of their comrades who fell in the desperately held Ypres salient.

Among them stood the Prince of Wales, Lady Haig, the widow of Britain's victorious commander; Admiral Jellicoe, president of the British Legion, who headed Britain's naval forces in the great struggle, and other commanders who bore a share in the battle of Ypres.

The pilgrims had come, some marching along the familiar roads and others by train, their numbers swelled by thousands who had gathered to witness the ceremony until it was estimated that nearly 20,000 men, women and children joined in singing the opening hymn, "O Valiant Heart."

The service, in which the huge congregation participated, was beautifully simple and supremely impressive.

Storm-Swept Florida

Hurricane Creates Havoc Over A Wide Territory

Jacksonville, Fla.—After hammering at communities in the sparsely settled sections of East Central Florida, the tropical storm emerged to sweep Winter Haven and other towns in the rich central citrus country. City officials at Winter Haven, approximately 50 miles east of Tampa, related that winds of 75 miles an hour locally had followed earlier gales of 40-mile speed.

Grave fears are felt for the great citrus orchards, laden with fruit, in the immediate path of the storm. Meanwhile refugees trickling in from the country between the new storm front and the Atlantic told of half a dozen towns and communities visited by damage from the storm.

Co-Operative Movement

Wholesale Society Expects To Establish 200 Stores In Saskatchewan

Saskatoon, Sask.—Referring to the recent announcement of the formation of the Saskatchewan Wholesale Society, which is being sponsored by the United Farmers of Canada to sell goods to consumers at as near cost as possible, W. Moss Thrasher, secretary, said that about 200 stores would be established within the first year.

Preference will be given to districts known to be favorable towards co-operative effort. Within the same period he hopes to see between 700 and 800 trading units founded so that the province will be fairly well covered.

To Identify British Products

London.—"Empire marketing begins at home," inscribed on a Union Jack, is a feature of the national park designed for the furtherance of a government scheme for ensuring the identification of British products.

Bombs Thrown By Bandits

St. Paul, Minn.—Blinded by tear gas bombs thrown by bandits the driver and five guards of the Sweeney Detective Bureau armored money car were robbed of \$20,000 in currency here recently.

New Telephone Service

All-Canadian Phone Service Between Winnipeg and East Is Inaugurated

Winnipeg.—Inaugurating the all-Canadian telephone service between Winnipeg, Toronto and Montreal, via Port Arthur and Port William, officials of the Bell Telephone Company, the Canadian Pacific Railway and the Manitoba Government, recently spoke to one another across 1,605 miles of copper wire.

The new line between Winnipeg and Montreal is approximately 1,605 miles, and is erected on Canadian Pacific telegraph pole line from Manitoba to Sudbury, via Port Arthur and Port William; from Sudbury it connects to all eastern points by the Bell Telephone Company's lines. The weight of copper of the new line amounts to 350 tons. There are nine repeater stations to amplify the conversations. This is the third stage in the all-Canadian telephone route the first being Winnipeg to Alberta in 1922, the second Winnipeg to the head of the Lakes in 1924.

The fourth stage is now being completed across the Rockies, the Canadian Pacific right-of-way, being largely used, construction now nearing completion for the coast-to-coast telephone service entirely within the Dominion.

GREATEST CROP IN HISTORY IS THE PREDICTION

Winnipeg.—Western Canada is on the threshold of its 1928 harvesting season, with present prospects pointing to the production of the greatest crop in the history of the country. Throughout the prairie provinces most encouraging progress is being made by all grains, and in districts where cutting has started, estimates of wheat yields have ranged from 25 to 40 bushels to the acre.

Recent reports from authorities making their annual field inspections have revealed the crops in varying stages with the most advanced having completed cutting, and in one instance threshed, while in the more backward areas another two weeks of favorable weather will be required to bring the crop to maturity.

The general condition, however, fits the 1928 crop slightly ahead of conditions at this date last year, and binders are expected to be humming over the western grain fields within a few days.

Cutting of barley, rye and oats, has been underway in some sections for the past week, with these crops yielding slightly above the ten-year average.

While no official estimates have yet been made of this year's wheat crop, the consensus of opinion of authorities who have travelled through the western provinces during the past week, is that final figures will show a crop of approximately 450,000,000 bushels.

The feature of the growing crop to date is its freedom from rust damage or other pest infection. Hail has taken a considerable toll, particularly in Saskatchewan, but the increased acreage seeded this spring is expected to offset this loss.

The first harvesters' excursion train is expected to reach Winnipeg from Eastern Canada this week. The railway companies also are moving thousands of grain cars to the various centers of movement.

Yet another indication of preparedness is the arrival of Leslie Boyd, chairman of the Board of Grain Commissioners, to make arrangements for the hearings on grain rates for interior elevators. These rates will be fixed by the board on the strength of the evidence submitted, and made public by Sept. 1.

Air Express Inaugurated

Before the propeller stops whirling the Canadian Pacific Express truck is on its way to the city with parcels for delivery. A new air route gives bi-weekly express service in each direction between Toronto, Ottawa, Montreal and the steamship off Rimouski. Two days is gained over regular express schedules, western consignments being transferred to the Vancouver Express at Toronto.

COMES TO AMERICA

Hon. Mrs. Loe Guinness, one of the most beautiful of English aristocrats, is to take up residence in Pittsburgh, Pa., with her husband, who has been placed in charge of his father's business in that city. Before her marriage, a year ago, Mrs. Guinness was Hon. Joan Yard-Bulwer, daughter of Lord and Lady Churston.

British Harvest Help

Satisfactory Arrangements Completed With The British Government

Ottawa.—Satisfactory arrangements have been completed with the British Government for the movement of harvest help from the British Isles to the wheat fields of Western Canada, according to a statement issued by the department of immigration and colonization.

This movement, which will begin at once, will be under the direction of the British Government, the Canadian National Railways and the Canadian Pacific Railway.

The two railways will be responsible for placing the men in harvest employment on their arrival from the Old Country and the Dominion Government and the Provincial governments will co-operate with the railways in placing these harvesters in winter farm employment in Canada after the rush of the harvest work is over.

Satisfactory arrangements have been made for the return fare of those harvesters for whom winter farm employment cannot be found.

English School Girls Arrive

Will Make Educational Tour Of Canada From Coast To Coast

Montreal.—Twenty-five English school girls have arrived in Canada to begin a two months' trip arranged under the auspices of the Imperial Daughters of the Empire. Their itinerary, which takes them to the maritime provinces, to Northern Ontario and Central Canada, the Rockies and the West, has been planned to give the girls a taste of the many phases of Canadian life. The party will return home on October 11.

Long Trek For Pension

St. John, N.B.—"Disabled soldier on way to Ottawa to fight for pension that was taken away," is the inscription on a placard which Joseph McIntosh, a returned soldier, wore across his shoulders as he left the city on a long trek to the federal capital to seek renewal of his pension of \$110.75 a month.

French Airmen Killed

Paris.—Captain Labbe and three assistants were killed when their plane crashed at Bourges near the end of a 24-hour flight. The plane was burned. The charred bodies of the men were recovered from the wreckage.

French Plane Crashes

Maurice Drouhin, Noted French Aviator, Is Fatally Injured

Orly, France.—Another attempt to fly from Paris to New York ended in disaster before it had even begun.

The giant tri-motored "Rainbow" crashed on the landing field at Orly aerodrome, killing the mechanic, Lanet, fatally injuring the pilot, Maurice Drouhin, noted French flyer, and injuring two others, Gianoil and Manuel.

The big plane, designed by Rene Cosnaut and built entirely of wood, so constructed that all of its essential machinery would be accessible during flight, was a complete wreck, parts of the wings, fuselage and wires being strewn for 1,600 yards along the field.

"The Rainbow" was being put through its final test preparatory to a start across the Atlantic this week when the accident occurred.

It was racing close to the ground at about 125 miles an hour when a few spectators noticed a huge wing wobbling. The engines were cut off then, but the deformation of the wing caused the giant plane to shoot almost perpendicularly into the air to a height of about 400 feet. There it slid to one side, apparently refusing to respond to the controls.

As it reached the ground it tore through a strong wire fence, knocked over iron posts, and crashed against the corner of a hangar, coming to a stop a crumpling wreck on the road bordering the field.

Dies From Wounds

Stefan Raditch, Croatian Leader, Succumbs To Injuries

Vienna.—Stefan Raditch, a Croatian peasant parliamentary leader, died recently at Zagreb, capital of Croatia. The city was grief-stricken and troops are everywhere ready to suppress trouble.

Raditch died of wounds received last June 20, in parliament, when a radical deputy, Puncica Ratchich, infuriated at frequent interruptions, whipped out his pistol and fired six shots into a group of Croats.

Each shot claimed a victim, two being killed, one of them a nephew of Raditch, and four wounded.

For a time Stefan Raditch's condition improved but he suffered a relapse, which finally brought about his death. Since his assassination Croatia has been in a condition almost of martial law, with troops patrolling its cities' streets to quell possible peasant demonstrations occurring as a result of the episode.

A Message To Women

Miss Isabel Macdonald Does Not Believe In Equality Of Sexes

Toronto.—Miss Isabel Macdonald, when visiting here with her father, Right Hon. J. Ramsay Macdonald, Labor leader, issued a message to the women of Canada. It read:

"Women are coming into public life not to work against men, but to co-operate with them in improving public affairs. I do not believe in equality. Men and women cannot be compared. Women are just as important as men but they are not equal any more than A and B in the alphabet."

EXTENSION OF PREFERENCE IS EXPECTED SOON

Ottawa.—The Citizen says: "A very important regulation vitally affecting British trade with Canada, is scheduled to go into effect this autumn, but just when this will be for the government to decide."

"As a matter of policy it has been agreed to increase from 25 to 50 per cent, the requirement of Empire labor and materials in British importations in order to entitle them to the British preferential tariff, but before this is operative, customs regulations have to be devised and put into effect."

"As the idea originated with Hon. J. A. Robb, his return from abroad next week is awaited before regulations are considered. There have long been complaints about goods, very largely manufactured in foreign countries and then sent to Great Britain for the finishing touches and shipped from there as 'Made in England,' this being eligible for the British preferential tariff."

"The new exaction of fifty per cent. Empire labor and materials will not only rectify this, but will have a large influence on the importing trade in Canada."

RAILWAYS MAKE PREPARATIONS TO HANDLE CROP

Montreal.—Canadian railroads are completing plans for moving the 44,000 harvesters called from Eastern Canada to help harvest the expected record wheat crop in the West.

The Canadian Pacific started its first excursion from the Quebec district on August 14, and one from New Brunswick, August 10. The fare from stations in Ontario and Quebec is to be \$15, and from points in New Brunswick, St. John, and west, \$20 to Winnipeg, plus half a cent a mile beyond all points in Manitoba, Saskatchewan and Alberta, and to including Edmonton, Calgary and Macleod.

The harvesters are all destined to Winnipeg, whence special arrangements have been made for their speedy distribution to points in the West where they are most needed.

Return fares are at \$20 from Winnipeg to points in Ontario and Quebec, and \$25 to New Brunswick, plus the half-cent-a-mile-rate to Winnipeg from points in the West.

The Canadian National will run its harvester excursions from August 9 to August 31. Special provision will be made for the care of families travelling on harvester excursions over the Canadian National System.

Preparations are practically completed by the railroads for movements of the new harvest. The Canadian Pacific has set aside more than 40,000 box cars for the movement, a much greater number than in any previous year. Seventy-nine great engines have been loaned by Eastern lines, 13 of these new locomotives being of the Mikado type with both superheater and feed water attachments.

Bins are clearing rapidly at the head of the Lakes. Grain carriers across the Lakes are moving at an average of 1,240,000 bushels a day.

Rich Gold Strike

Gold and Platinum Found In Northern Saskatchewan

Edmonton, Alberta.—Said to be incredibly rich in gold and platinum, a "strike" has been made along the north shore of Lake Athabasca, to the east of Black Bay, in the province of Saskatchewan, according to a statement made by Ed. Meyers, Fort Chipewyan trader, who is now in the city.

Jack Hersey, well-known northman, made the strike, following sporadic search for many years along the north shore of the lake, which has long been rumored to be rich in gold-bearing quartz.

Tests made at the University here disclose that some of the ore carries a content of precious minerals as high as 84 per cent, although this has not yet been confirmed.

According to another northerner, Charlie L'Argent, who makes one of the syndicate which is outfitting to head for the scene of the new find, one of the assays gave average returns of \$45 per ton of some of the quartz shipped south from the scene of the find.

Leaves Big Fortune

London, Eng.—Capt. Alfred Loewenstein, the Belgian capitalist, who met his death by falling or jumping from an airplane over the English Channel the night of July 4, lost \$60,000,000 in gold and diamonds preceding his death, according to the Evening News. This newspaper said it learns that Loewenstein left \$40,000,000 to be equally divided between his wife and son.

Hickman Sentenced

Los Angeles.—William E. Hickman was sentenced to be hung at San Quentin penitentiary on October 19 next, for the slaying of Marian Parker. Judge Douglas Edmonds over-ruled nine defence objections before setting the second hanging date for the youthful kid-napper who slew the 12-year-old school girl here last December.

May Defer Old Age Pensions

Toronto, Ont.—Old age pensions may be deferred in Ontario for another year. Indications are that the survey ordered by Premier Ferguson will not be completed for the next session of the legislature, and so the bill may come up on the eve of the next election.

Buys New Plane

Dessau, Germany.—Charles A. Levine, first trans-Atlantic aeroplane passenger, has purchased a Junkers plane of the Bremen type for 100,000 marks (about \$23,850) for three delivery, here next week.

Would Reclaim Sahara Desert

Plan To Create Inland Sea In North Africa

A plan to change the climate of Northern Africa by creating inland seas in the Sahara Desert is being seriously considered by the French government and the cabinet is expected to make a decision on the question in September.

Dwight Braman, of New York, is the engineer who presented the plan and undertook to raise \$50,000,000 to further the project. He made an engineering study last spring of the arid wastes lying below the level of the Mediterranean and extending from the Gulf of Gabes westward to Biskra, and formulated plans to cut three ship canals forty feet deep and two hundred feet wide connecting the Mediterranean sea at Gabes with three dry saline lake beds called "Sahats."

It is estimated that Mediterranean waters by means of these canals would permanently flood some 10,000 square miles reaching from Gabes westward. This would mean a water route of about 250 miles for seagoing ships through a part of Tunis and deep into Algeria.

The main purpose, however, is to affect climatic conditions and increase rainfall, which Braman undertakes to demonstrate, to be the result.

His scheme is based upon that of a commission of French engineers, chief of whom was M. de Lesseps, who in 1882 made a minute survey of the entire region.

Prosperous Toronto

Residents Pay More Income Tax Than Any Other City In Canada

Prosperity must have struck the City of Toronto in a great wave last year, for the Queen City paid nearly three millions more in income tax than in the previous year, the greatest increase of any city in the Dominion, not excepting Ottawa.

Toronto's contribution to the Dominion's treasury was \$13,448,545. Of the other principal cities in the Dominion, twelve showed an increased income tax and seven a decrease. Some of the increase is due to the efficiency of the department of national revenue, and includes some of the arrears cleaned up under threat of prosecution.

Toronto's income tax collections for 1928-29 were—\$13,448,545, an advance of \$2,992,517 over the 1927-28 collections of \$10,456,028. Montreal's 1928-29 collection of \$16,195,033 was \$2,732,704 ahead of the 1927-28 figure of \$13,462,329.

Hard To Replace

Communities Should See That Old Industries Are Supported

It takes at least two new industries to replace in employing capacity one that has failed or moved elsewhere. Few new industries start on a large scale. The city that lets a long-established industry die for lack of help that could properly be given cannot ordinarily make up the economic loss, at least in a short time, by bringing in another industry to take the place of a defunct one. It is an almost literal translation of the old adage about the birds, the hand and the bush.—New York Sun.

Jasper National Park

Jasper Park, which is situated on the Canadian National Railways in the northern part of Alberta, has a total area of 6,330 square miles. A great portion of this huge mountain wilderness is still unexplored. The entire region is rich in historic association.

She: "We've been waiting a long time for that mother of mine."
He: "Hours. I should say."
She (rapturously): "Oh, George!"

Lack of variety in the food is bad for the digestion.

"It is a long time since I saw you last, miss."
"Yes. I have been on a voyage round the world!"
"So have I. How strange that we did not meet."—Vikings, Oslo.

W. N. U. 1746

Ancient Chateau Demolished

Ruins Of Thousand Year Old Castle In France Are Removed

Neither governmental nor individual funds could be obtained recently to save one of the most interesting monuments in central France—the chateau built by Thibault III, King of Navarre, in 1199 for Queen Blanche.

The ruins of the chateau, located at Pouilly, in the Aube Department, consisted of a stone tower with arched windows and a series of fortified walls. With this historical background they could have been transported to any country estate in Europe of the Americas at little expense. The windows and portals were in excellent condition, and there were several interesting inscriptions attesting the age of the edifice.

For several months the government waited for collectors to enter their bids for the premises, but none appeared on the scene. This caused considerable surprise as in the past the mere mention of a thousand-year-old building would have been sufficient to bring collectors and experts from all parts of the world. The French antiquarians made a final desperate attempt to save the ruins as a part of the nation's architectural patrimony, and the question was even discussed in the Chamber of Deputies.

Needing funds for other purposes, however, the Minister of Education and Fine Arts turned a deaf ear to such proposals, and is said to have refused to authorize the opening of a public subscription.

And one evening at twilight, the walls and turret which had survived the hottest conflicts of the Hundred Years' War, went tumbling to pieces by a tremendous charge of cheddite.

Nothing Pays Better

Education Is Greatest Asset To Success In Life

Does education pay? Surely, there is nothing which pays better. In these days of competition it is the one absolutely indispensable factor, without which success is practically impossible. But, apart from material considerations one can scarcely estimate the value of enlightenment to the community as a whole.

Ignorance in one form or another is responsible for most of the woes of the world—the war against ignorance begun in schools and carried on through life is the mainspring of civilization. That country is the most civilized which gives its children the best chance of developing their moral and intellectual faculties. When such development has been adequately provided for, there need be little worry about other things. The schools are the very foundation of society.

The Cost Of Progress

Trees Four Thousand Years Old Are Cut Down To Build Bungalows

The giant redwoods of California are being cut down ruthlessly by human companies. The irony of it is that among the redwoods are cutting down trees that are forty centuries old—to build bungalows, make railway ties and split into grapestakes—chiefly grapestakes. Any fool can make a grapestake; but "only God can make a tree." When a big tree falls with the boom of thunder, everybody knows that something lies prostrate that can never be replaced. A second growth may spring from the stump; but humanity is too impatient and avaricious to wait 4,000 years again.—Los Angeles Times.

No Place Like Home

The Invisible Ties That Bind Us To The Home Circle

The word "home" is indeed linked up to an alabaster box of sentiment, very precious, whose fragrance fills the life. Into it has been gathered our most sacred memories, our tenderest associations, our brightest hopes. It matters little whether the home of one's childhood has been a cottage on the hillside or a house in some city street—round it is woven a romance of interest that grows with the years; it, from distant places alike of work and thought travels back the heart with wistful regret.—Millgrate Monthly.

Angry Scot—Dae ye hear me? I've a complaint.

Postoffice Official—What's your complaint?

"The ink in here's so thick that it clogs ma fountain pen."

Mrs. Grogan—It was awful! Twenty-five Bolsheviks and one Irishman killed in the wreck!

Mrs. Callahan—Indeed! The poor man!

Canada has the greatest nickel deposits in the world

Vitamines For Growing Chicks

Cod Liver Oil Is Recommended For Leg Weakness

Leg weakness has been a common disease of young chicks, but investigation of recent years have taught poultrymen how to avoid this trouble. If growing chicks get an abundance of direct sunlight they are not liable to contract this disease, but if housed for four or more weeks they are invariably subject to the trouble which may be prevented by special feeds that are known to be right in vitamins. Cod liver oil is now used in many poultry flocks and its virtue is believed to be due to its richness in vitamins. A pamphlet in the "Artificial Brooding of Chicks," prepared by the Dominion District Poultry Promoter and the Provincial Poultry Superintendent for New Brunswick and distributed by the Director of Publicity of the Department of Agriculture, at Ottawa, recommends the use of cod liver oil in amounts of one to two per cent, of the mash according to the degree of confinement. This, it is claimed, will prevent or even cure advanced cases of leg weakness. Egg yolks, and canned tomatoes are claimed by the authors to have a value in preventing leg weakness.

Other feeds rich in vitamins are yellow corn, green feeds, immature cut clover and alfalfa hay. These if used in an otherwise well balanced ration will give the flock the vitamins necessary for their well doing. The plan recommended for mixing the cod liver oil in the dry mash is to first mix the oil with bran until it is evenly saturated and then to mix the bran with the other ingredients of the mash. As the vitamin quality diminishes when mixed with the feed only sufficient mash should be mixed at a time to do the flock for three or four days.

Are Sun's Rays Declining

Scientists Say That Old Sol May Quit Any Day

Jupiter, the largest planet of the sun's family, is shooting enormous volcanic bombs into space, says a French astronomer. Some of the comets and fire balls that sometimes light the earth may come from Jupiter. Modern reflecting telescopes are capable of photographing three billion of the possible thirty billion stars in our universe system. Each is a sun, most of them larger and brighter than ours. They shed energy until burnt out.

It is said that our sun is perilously near the burnt-out stage. Any day it may totter. But since a day in the universe may be a million years, there is nothing to worry about.

Forest Fire Situation Improved

Season Of 1927 Was Unusually Favorable In Regard To Fires

Reports submitted by field officers of the Forest Service Department of the Interior, show the season of 1927 to have been unusually favorable in regard to forest fires. Six hundred and six fires were reported on Dominion lands in Alberta, Saskatchewan, and Manitoba; protected by the Forest Service during the season mentioned, as compared with 1,398 fires in 1926, 1,165 in 1925, and 1,487 fires in 1924. The area of merchantable timber burned over was 98,207 acres in 1927, as compared with 133,220 acres in 1926 (the worst fire season on record for many years), 126,970 acres in 1925, and 239,320 acres in 1924.

John: "I suppose you think I'm a perfect idiot?"

Molly (sweetly): "Oh, no; none of us is perfect!"

Italy has at least 70 privately owned railways.

German Invents Film Paper

Paper films are the newest German invention. It is asserted they will revolutionize the picture industry. A Berlin engineer announces that after years of tests he has succeeded in manufacturing paper which is as susceptible to light as celluloid. It is not inflammable and is cheaper than celluloid film. The Scherwin studies say the invention is a complete success.

Quilt From Bridal Costume

Interesting Memento Of 1823 Placed On View In Museum

Frugality and sentiment are joined in the story of a silk quilt made of squares of bridemaids' dresses, placed on view in the Brooklyn Museum as a loan from Mrs. Theresa Hallock Welsh, of Manhattan. It dates back to the Quaker wedding of Deborah Coggeshall, of New York and Elwood Waller, of Philadelphia, in 1823.

Bridal costumes in the 19th century were commonly regarded as made for a single wearing, disappearing from sight thereafter, in packings of tissue and lavender. On this occasion the mother and aunts of the bride persuaded the owners to surrender the garments in order that they might be converted into a quilt which the bride might cherish as a memento. Their faith that it would receive her tender care is justified by its present neat, unworn appearance.

The colors in the quilt include several shades of beige, or unbleached silk, several shades of greenish gray and a variety of light gray from pinkish to oyster white shades. A vase of flowers is the central motif. Three quilted borders surround it. The first is a design of grapes and leaves, the next an arrangement of feather scrolls and the third is of leaves.

The museum story of the quilt says much careful planning and many days of work must have been given to design and make it, and the bride held it through life as one of her most prized possessions.

Internal Parasites Of Swine

Sanitation Is Of Prime Importance In Dealing With This Pest

Unthriftness in pigs is often due to infestation of internal parasites. In the latest edition of the bulletin "Swine Husbandry In Canada," of the Department of Agriculture, Ottawa, an article has been introduced from the pen of Dr. Lionel Stevenson of the Ontario Agricultural College, who in his opening sentence, says:

"Why feed a worm-infested pig for ten or twelve months to get it up to market weight? Better swat the parasites; they have no market value, while bacon on the hoof has."

Four parasites in particular are dealt with in his paper and clearly defined treatments are given for their control. Sanitation is the of the utmost importance in intestinal parasite control. Clean stock if permitted to run in infested yards, pens and fields quickly become victims of parasites as well as distributors of parasite eggs. The extensive use of colony house and fresh ground for yards during the open season of the year is recommended for the keeping down of infestation.

The medicinal treatment recommended includes the use of such medicines as oil of chenopodium, Santonin, Benzene, and Arca nut, in doses that should be used for pigs of different ages.

German Invents Film Paper

Paper films are the newest German invention. It is asserted they will revolutionize the picture industry. A Berlin engineer announces that after years of tests he has succeeded in manufacturing paper which is as susceptible to light as celluloid. It is not inflammable and is cheaper than celluloid film. The Scherwin studies say the invention is a complete success.

A TITLED FARMER

Scion Of Noble Family. Has Extensive Holdings In Alberta

Coult De Topor, English economist and philanthropist, was among the cable passengers sailing on the Cunarder, Ascenia, for Europe recently. The count, who also possesses the title of Duke of Osselin, is a cousin of the late Emperor Franz Josef, of Austria. His family has been prominent in Polish and Austrian history since the year 1010, one of the count's forebears being Count Maximilian, chancellor of Poland.

"I have no respect for titles," remarked the count, "but family matters make it essential that I should use mine. To my mind, the only thing of any account is the place in this world man creates by his own efforts."

Count De Topor has extensive interests in Canada, mainly through his efforts the town of Vermilion, Alberta, has now extensive farm lands. He erected 40 houses there for farm workers and had a large plot of waste land turned into a nice park. Wooden sidewalks were replaced with cement ones. Farm workers are happy, and they have lived rent free on his farms. They have made great splendid progress, he said, that some of them saved as much as \$10,000 in three years, and came to him wanting to buy property.

Count De Topor has extensive interests in the west and around Edmonton, which include nearly 60,000 acres of farm land.

"Farm land is cheaper in the Canadian west than anywhere else in the world," he remarked, "and the west holds a marvelous future for the ambitious farmer who is not afraid of a little hard work."

Count De Topor said he avoided anything to do with immigration of agriculturists into this country. He pointed out that his visit was private, though he was doing his best to further the claims of Canada as the coming agricultural nation of the world.

In addition to his philanthropic and economic interests, the count is a doctor and lawyer, though he does not practice.

"I find no time to practice," he said, "but I am rushing home now to look after a sick friend who is lying ill in Le Pouldu, Finistere, Brittany, after which I shall return to England to my home in East Grinstead, Sussex."

Can Be Exaggerated

Intelligence Not Always Due To Ability To Read And Write

In an article on the Prince of Wales, a writer in a London Sunday newspaper says: "You will not find him befuddling his mind with books. I do not remember ever reading a sentence with more curious implications. . . . It books only befuddle the brain, then it would be better if all the schools were shut and schoolmasters who teach reading, writing and arithmetic to innocent children should be sent to prison as public dangers. . . . Still, we are inclined today to exaggerate the importance of reading and writing to the growth of the intelligence. A considerable percentage of human beings would be just as intelligent as they are at present if they had never learned to read or write, and I have known men who could not read or write and who were nevertheless better company, more imaginative and more intelligent than others who could. Speech plays a far more important part in the life of the ordinary man than reading and writing. It is possible for a man who can neither read or write to be either a good poet or a good farmer, and a world containing good poets and good farmers is a world in which any of us ought to be reasonably happy."

Always Trustworthy

Senior Partner: "One thing I like about our new clerk is that he is trustworthy. You can always tell what he is going to do next."

Junior Partner: "And what is that?"

Senior Partner: "Nothing."

Nearly 1,000,000 pounds of potatoes are produced annually by convicts of six Canadian prisons and of this amount nearly two-thirds are grown on prison lands of Saskatchewan and Manitoba.

Pointing to 16 residents living within 100 yards of one another, who have combined age of 1300 years, Shantlin, in the Isle of Wight, is claiming longevity record of the world.

It is best to be satisfied with your lot even when it might have been a lot more.

The arguments of the loquacious individual are mostly sound.

Developing Rust Resistant Wheat

Dominion Cerealist Says Goal Will Be Reached Very Soon

Within three years Western Canada should have a rust resistant wheat, which will grade as high as the varieties now being grown, according to L. H. Newman, Dominion Cerealist, recently.

Mr. Newman is spending a month or more in the west, inspecting the work of the Dominion Rust Research Laboratory, at the Manitoba Agricultural College, and the various Dominion experimental farms in the west. He will also visit farms where rust resistant grains are being produced for experimental purposes.

The Ottawa official announced that the work at the research laboratory at Winnipeg would be extended within a year. An expert cytologist, Miss Hollingshead, formerly of Saskatoon, Sask., and now at Berkeley College, Calif., has been added to the staff, he said, and will assume her new duties next spring.

The appointment, Mr. Newman said, is the first of its kind in Canada, marking a distinct advance in the linking of pure scientific research with the practical purposes of agriculture.

Another phase of cereal work which is engaging the attention of the department is the raising and marketing of high grade malting barley. "We have found that, 'trib', a variety of barley grown in Manitoba, corresponds closely with the favored variety bought by Old Country brewers in California," Mr. Newman said. "Prof. S. C. Grant, of the Manitoba Agricultural College, is now in Finland to confer with the heads of malting farms there on the marketing of barley."

Explanations Are Logical

Expression "Odds and Ends" Goes Back To Time Of Shakespeare

"My brain," wrote Washington Irving, "is filled with all kinds of odds and ends."

Curious that we should say "odds and ends" to refer to a multiplicity of miscellaneous objects or details. And for the derivation of this colloquialism that has lasted for centuries, we have two interesting explanations.

"Odds," it is authoritatively stated is a straight corruption of the now obsolete English word "ort," which meant fragments. This word "ort" occurs frequently in the works of Shakespeare and Ben Jonson, in exactly this sense.

The other explanation is that the expression "odds and ends" comes from the old Saxon phrase "ords and ends." "Ord" was the Saxon word for beginning; so that in the old Saxon language, the phrase "ords and ends" really meant literally "beginnings and ends."

Both explanations seem logical and the probability is that they are both right and that the words "ords" is derived from the Saxon "ort," subsequently becoming "odd."

To Complete Study Of Arctic Flora

Dr. M. O. Maile, botanist of the National Herbarium, Ottawa, is carrying on investigations in the regions around Hudson Bay and Hudson Strait. He will collect botanical material and study northern plants in preparation for a comprehensive work on the flora of Arctic Canada. Dr. Maile visited posts in the Arctic archipelago with last year's Canadian Government expedition and this summer's investigations are intended to confirm observations made in 1927.

A Student From China

Announcement is made by the Moose Jaw College that a record for distance will be established by one scholar who will attend this fall. This student is Chan Chick Foo, a graduate of Pui Ying Middle School at Canton, China, who is registered in the senior matriculation class. He sails this month from China to complete his University course in Canada.

A miser is known by the money he keeps.

"I seem to know your face."

CHAPTER XXX.—Continued

Only desperate men would ever have dreamed of such a plan as theirs. The camp was fenced with eight strands of barbed wire, and every sixth fence-post carried an ear of light. But with the aid of a file which one of the men possessed, they would cut the two lower strands, at dusk, just before the lamps were lighted, and crawl through. At the last moment the other two men grew panicky.

"It is sure death," said one; "they'll catch us. I can see how they are watching us. I'd go, and take a chance only I have a wife and kid—I've got to think of them."

The other man declared the plan a foolish one on account of the weather. "January in Germany is too much like the corner of Portage and Main," he said.

A new batch of prisoners had come in that day, and one of them, who was standing near enough to hear, came to Jack and asked if he might go. He was a grizzled man of about thirty-five.

"I have no one depending on me," he said, "and I have already tried twice."

"Come along,—sure," said Jack, "three times and out."

"Thank you so much," said the man heartily.

Jack was startled by his politeness. A prison camp does not always foster the social amenities.

"Your name is Moran, is it not?" asked his new friend.

"Mine is English,—at least that is my nickname. We are both from Canada. . . . We might as well try

What Will
you
do

When your Children Cry for It

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family, there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhoea checked. A vegetable product, a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use in emergencies, or for everyday ailments. Any hour of the day or night that Baby becomes fretful, or restless, Castoria was never more popular with mothers than it is today. Every druggist has it.

Fletcher's
CASTORIA

W N T 1746

boldly into a garden as they came through a village. He had a way of quieting the dogs by a peculiar whistle and this gave him a distinct advantage. The dogs who came out barking fiercely, changed their attitude when he spoke to them, and even showed a disposition to follow him.

"If the dogs could bring us food we would have plenty," he said that day, as they sat in the spruce thicket. "The chances are against us, Jack, but one of us may get over." "One of us!" exclaimed Jack. "It must be both or none!"

"No!" said the other, "it does not matter much about me. No one cares so very much, and it happens that the one person who cares a little bit about me, cares very much about you."

Jack looked at his companion—dishevelled, dirty, long-haired and long-whiskered, his eyes bloodshot—"And who is that?" he asked gently, as if he would humor his poor friend's mood.

"Your wife, Helmi."

"Helmi!" Jack repeated. "My Helmi!"

"Yes, yours—she is the only woman except my mother who ever cared whether I lived or died."

Then he told Jack of his quarrel with Larsen in the mines, and of Helmi's kindness, and of the week he had stayed in her house.

"She asked me to pray for you, Jack," he concluded, "and I kissed her golden hair. She told me she was sure you would go to the war, and asked me if I met you would I be your friend. That is why I came—it seemed as if I must come when I found you at Vancouver."

Jack's voice trembled as he spoke. "Then you are Arthur Warner, and I have been doing you wrong in my thoughts. No one told me you were hurt—they only gave me half the story. When I got back I found Helmi gone—gone without a word. She had been gone a week—I was a month late—but she might have waited."

The trees were throwing long, cold shadows over the weeping current of the river.

"Did you not know there was a good reason for her going?" Arthur asked, after a pause.

"I knew nothing," said Jack. "What reason could there be?"

"She went to the city to a hospital to give birth to your child."

Jack's face grew white with pain. "How do you know?" he whispered.

"She told me. I wanted her to come to England and train as a nurse, and when I urged her, she showed me a little dress she had been making, and told me, and she told me she was glad. Her only sorrow was that you were away and the adventure you were on was dangerous."

"I did not know," Jack groaned. "There was silence then, when neither man could speak."

(To Be Continued.)

Sir George Will's Estate

The tobacco magnate, Sir George Alfred Will, who died July 11, left a fortune of \$50,000,000. The bulk of the estate goes to his children, but at least twenty millions will go to the government in the shape of a levy on inheritance. Sir George was the tenth of his family to leave an estate exceeding a million pounds.

An auto bus company in Europe is compelling each passenger to buy in addition to the regular ticket, a special slip covering his share of the gasoline tax.

The world's record for the one-mile walk, was set by G. H. Goulding, of Toronto, Canada, in 1910. His time was 6 minutes and 25.8 seconds.

The name "midshipman" for cadets originated in the English navy about 200 years ago.

VERY HARD RED
PIMPLES ON FACE

Was Terribly Disfigured,
Healed by Cuticura.

"My trouble began with small pimples breaking out all over my face. They were very hard and red and sore. The pimples burned, especially when I rubbed them, and my face was terribly disfigured. The trouble lasted over a period of six months."

"I used several well-known remedies without success. I decided to try Cuticura Soap and Ointment so purchased some, and after using two boxes of Cuticura Ointment, along with the Cuticura Soap, I am grateful to say that I am completely healed." (Signed) Eldred Clark, Box 87, Mountain, Ont.

Rely on Cuticura Soap and Ointment to keep your skin clear.

Teeth and Health

Issued By The Canadian Dental Hygiene Council. Published By The Saskatchewan Dental Society

THE SIX YEAR MOLAR

You have heard your dentist call this first double tooth "the six year molar."

Why is this? You have perhaps guessed it—that it is because it erupts usually at about the sixth year.

Now, you have been observant enough to note that it is a first tooth in the sense that no tooth was lost to make room for it.

And coming in at this early age, you may have thought it a "baby tooth" which would, in due time, be shed.

So, in your child, you have perhaps neglected to give it the care that it deserved—with disastrous results.

Without doubt, this neglect is the most common of dental sins committed by parents, and perhaps with gravest consequences to their children.

Because, should this tooth become so badly decayed within four to six years following its eruption as to infect the "pulp," your dentist as a rule, has no recourse but the use of the forceps—and, losing the tooth.

Of the whole series is deranged, since, in this tooth has been lost at an early age, the second molar has "drifted" forward to fill the space, with the first molar replacing in turn as it grows.

But this is only rarely the case—better a little care at the proper time to prevent this trouble rather than to rely on Nature for a cure.

Co-Operative Wool Growers

Shipments Already 50,000 Pounds Over That Of Last Year

With the shipment of 12 carloads of domestic wool from Regina, recently, the Canadian Co-operative Wool Growers' Association is already 50,000 pounds over last year in its shipments from Saskatchewan and Manitoba, according to W. W. Thompson, manager, at Regina.

Mr. Thompson said two more carloads would complete the season's work, and he anticipated that in the next two months the 1926 shipments would show a total increase of about 100,000 pounds over those of 1925. A substantial increase also had been shown in the range wool shipped from Maple Creek.

The Many-Purpose Oil.—Both in the house and stable, there are scores of uses for Dr. Thomas' Electric Oil. Use it for cuts, bruises, burns, scalds, the pains of rheumatism and sciatica, sore throat and chest. Horses are liable very largely to similar ailments and mishaps as afflict mankind, and are equally amenable to the healing influence of this fine old remedy which has made thousands of firm friends during the past fifty years.

"I notice that the humorists have been picking on the mosquito a good deal lately," writes J.R.M. "But I can assure them that the mosquito has his good points. He's a hospitable chap; he'll give you a bite and a swell time afterwards."

Political Supporter: "Are you finding the campaign interesting?"

Would-be M.P.: "Well, I am certainly learning a lot about my past I never knew before."

Papa: "But has he any self-confidence?"

Pearl: "He must have. Dad. He opened a checking account with borrowed money."

According to a recent announcement, Tokio, Japan, has nearly 6,000 confectionaries and bakeries, and only about 1,000 meat markets.

The kind of person Barnum said was born every minute is now born twice a minute.

Minard's Liniment—the Universal remedy.

Granted Temporary Parole

Two Negroes Sentenced To Death May Escape Penalty

Governor Graves, of Birmingham, Ala., granted a temporary parole of 60 days to two negroes convicted of murdering a negro who later returned to her home after several months' absence on a visit to relatives. The two men were charged with chopping the woman's body in pieces and throwing them into the Alabama River. "The parole was granted pending an official investigation."

MANY MOTHERS

RECOMMEND THEM

Baby's Own Tablets Are Fine For Nervous, Sleepless

From Canada the fame of Baby's Own Tablets is spreading over the world. Mothers recommend them to other mothers and wherever they are tried nothing but words of praise are heard for these pleasantly little tablets that promptly relieve the minor ailments of young children.

"Baby's Own Tablets are one of the best remedies for children's ailments I have ever used," says Mrs. Arthur T. Allen, of Auburn, Me.

"My little girl was nervous and could not sleep. I tried the Tablets and she was relieved at once. She was also troubled with constipation and nothing seemed to help her. I had used the Tablets but a short time before her bowels were regular. All mothers should keep Baby's Own Tablets in the house, for they are a valuable remedy."

Baby's Own Tablets are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by The Dr. Williams' Medicine Co., Brockville, Ont.

Export Trade With Germany

Canada's export trade with Germany will be greatly increased under favorable treaty agreements which the Dominion is now endeavoring to establish with that country, according to Mr. B. Palmer, newly appointed Assistant Canadian Trade Commissioner at Hamburg.

Contract For Plane Hangar

The defence department is going to construct a large hangar for airplanes at the Rockcliffe Airfield near Ottawa, and the contract has been secured by MacDonald Brothers, Ottawa, the amount being in the vicinity of \$50,000, it was announced.

Let Minard's Liniment Relieve Pain

Canada has given 57,000 acres of land to railway companies in the Northwest.

Canada is 18 times as large as France, 20 times as large as Spain.

Little Helps For This Week

"And now men see not the bright light which is in the clouds; but the wind passeth, and cleanseth them.—Job xxxvii. 21.

His purposes will ripen fast, Unfolding every hour. The bud may have a bitter taste, But sweet will be the flower.

Blind unbelief is sure to err, And scan His work in vain; God is His own interpreter, And He will make it plain.

—William Cowper.

There is nothing in what has befallen or befalls you which justifies impatience or peevishness. God is inscrutable, but not wrong. Remember if the cloud is over you that there is a bright light always on the other side; also, that the time is coming, either in this world or the next, when that cloud will be swept away, and the fulness of God's light and wisdom poured around you. If your life is dark, then walk by faith; and God is pledged to keep you as safe as if you could understand everything.

—Horace Bushnell.

There may be other corn removers, but you will not be completely satisfied until you have used Holloway's Corn Remover.

Homes For French Poor

Paris is preparing to turn land- lord on a large scale. Construction of modern apartments, on the site of one-time fortifications, is now under way. Officials estimate that 10,000 Parisian families will be housed in the new buildings at a cost of about \$100 a year, for four rooms and bath.

A Menace To Health

Our old enemy the house fly is with us again. He never fails to come around when the warm weather arrives. To annoy people and to cause trouble seems to be his special aim in life. From the baby's face to father's bald head, to the milk picher and to the food are some of his journeys well known to all of us. Yet in spite of this, and possible because he is seen too often, it is doubtful if many of us ever fully realize the danger and filthy ways of this common pest.

The house fly lays her eggs (120 at one time) in fresh horse manure. She prefers it, but she will use any heap of garbage or filth. With a very short incubation (2 weeks) period it can be seen how rapidly flies will multiply unless they are controlled. Naturally the best way to control the fly is to destroy the eggs or maggots before their wings are developed and they can move about rapidly.

Why is it necessary to destroy flies and keep them from hatching? All flies can carry disease germs; they are all filthy in the extreme. The legs of flies are provided with a great many short hairs (100 or) bristles, and as the fly walks over filth containing disease germs, some of these are collected and held by the hairs. When the fly goes again to take a drink from the milk picher or touches food, some of the germs will be left behind in the milk or on the food. When these are swallowed later with the food by the baby, or anyone else, they may cause such diseases as ty-

phoid, diarrhoea, dysentery, or other illness.

Experiments with the house fly prove that it can be best controlled by sprinkling the infested parts of the manure with a three percent solution of Lyman's Disinfectant. One gallon of disinfectant makes 33 gallons of the solution and costs about 60c per year per horse. The solution should be applied about every second day or sufficiently often to ensure that all maggots are destroyed.

For the few that will escape this treatment a cone trap should be employed. Placed in a sunny place, with a tasty bait such as molasses and water, it will account for most of those left.

POLICE COURT

Thos. Sandman was arrested last Tuesday on the charge of throwing beer into the face of Allan Carter, son of the proprietor at the Acadia Hotel, also for disorderly conduct and creating a disturbance. The offence was committed on Monday evening. Trial took place before Justice of the Peace J. C. Cottrell at Cereal this afternoon.

Here and There

(11) The Maritime Livestock Market was organized in March, 1927, to market Maritime livestock—chiefly hogs, lambs and some cattle—for 7,000 members of the province in the three Maritime Provinces. The report of the first year shows \$52,621 received for 29,417 lambs, 15,513 hogs, 29 calves and 414 cattle.

An extension to the air express services maintained by the Canadian Pacific Express Company has been announced, and a new air line will be opened early in September between New York via Albany and Montreal. Lines are already operating between Rimouski, Montreal, Toronto, and Ottawa.

A name of unusual distinction will be added to the Canadian Pacific's Royal Family of ocean steamships when the fourth 20,000 ton vessel of the new "Duchess" class is launched in Scotland. She will be named the "Duchess of York", and will be christened by Her Royal Highness the Duchess of York herself, the ship's name being recently changed from the "Duchess of Cornwall".

Despite the doubts of nervous tourists, the grizzly bear is more attracted by the sight of a huckleberry bush or a stream full of fish than the prospect of a juicy specimen of humanity, and the splendid crop of huckleberries now in British Columbia will probably contribute to a successful hunting season during the month of September and the early part of October.

Port William, Ontario. — Three grain elevator corporations with large interests at the Head of the Lake are involved in a merger of several powerful Canadian terminal and elevator companies, the new company being known as the Canadian Consolidated Grain Company. A total of 12,000,000 bushels of elevator capacity will be owned and operated by the new company.

Betty and Buster Bruin, two little black bear cubs, have sailed from Montreal for Italy where they will be presented to the Marquis de Pinedo, the famous Italian round-the-world flier. They are woolly babies, scarcely larger than a child's toy teddy bear, and of an amiable disposition. The cubs were obtained by Mr. B. Roncarelli of Montreal, through the General Tourist Department of the Canadian Pacific Railway, and are similar to the little bears sent over by him a few years ago to Mussolini.

The Dominion Government is now in for pigeon breeding with the object of training these birds for purposes of reconnaissance. The Department of National Defence is to have charge of the work. The Civil Service Commission has announced an open competitive examination for a pigeon-loft manager. In connection with the civil government air operations of the Department of National Defence, to organize and administer a pigeon communication service.

The Canada Goose makes remarkable migratory flights but it is not generally known that civilization has so far effected his habits that sometimes he travels by railway. A pair of wild geese enjoyed this modern luxury passed through the Windsor Station, Montreal, under the proverbial wing of the Canadian Pacific Express in a specially constructed cage. There are a number of bird sanctuaries throughout Canada and the United States where civilized geese are kept to reassure the companies that all is safe and secure for them to step and rest on their flights north and south.

An Express

The Canadian Pacific liner "Empress of Australia" in Southampton Roads. From a height of two thousand feet the liner looks like a toy boat although her registered tonnage is 24,800 tons and she is one of the fastest liners to come up the St. Lawrence River.

We want to know you better

THE church has a definite service to perform. Its purpose is to help humanity. It wants your help in its efforts to help others. We want to know you better. Won't you come to church next Sunday, shake hands, and say you are ready to help in the greatest work on earth today—the work of bringing the world to Christ?

United Church, Chinook Sunday, August 19, 1928

Ramsay MacDonald Tours Canada

Group taken aboard the Canadian Pacific liner "Empress of France" on the arrival of the leader of the British Labour Party, Ramsay MacDonald and his three daughters, Isabel, Joan and Sheila, for a five week tour of the Dominion. Left to right: Joan MacDonald, Isabel, youngest member of the L.C.C., Captain Giffiths, commander of the "Empress," The Right Hon. J. Ramsay MacDonald, and Sheila, 13, from Ramsay MacDonald and his daughters will tour Canada, visiting Banff, Lake Louise, Vancouver and other Western points and sail for England in September on the "Empress of Australia."

Miss Robinson, sister of Lloyd Robinson, who has been visiting friends in Vancouver returned on Thursday morning.

ADVERTISEMENT Mortgage Sale of Farm Property

Pursuant to the directions of the Registrar and by virtue of the Powers of Sale provided by "The Land Titles Act," under a certain mortgage which will be produced at the time of the sale.

There will be offered for sale by public auction at the Acadia Hotel in the town of Chinook, in the Province of Alberta, on Saturday, the 1st day of September, 1928, at the hour of two o'clock in the afternoon, the following property, namely:

1. The east half of section three (3), in township twenty nine (29), range eight (8), west of the 4th meridian, Alberta, containing 320 acres more or less, excepting thereout all mines and minerals reserved unto the Crown the right to work the same.

Terms of the sale to be 20 per cent cash at the time of the sale, and the balance according to the terms and conditions to be made known at the time of sale or upon application to the vendor's solicitors.

The above property will be offered for sale subject to a sealed reserve bid and free from all encumbrances, save a half crop lease in favor of Hilda Young, expiring the 31st day of December, 1929, but terminable between the 1st day of February and the 1st day of March following in any year by notice, and taxes for the current year.

The vendor is informed that the above property is situated about four miles from the Town of Chinook and that improvements consist of a frame house 14x24, one and one-half stores with shingle roof, and lean-to 10x20. There is one and one-half miles of two wire fence. Soil is clay loam of fair depth with clay subsoil and 160 acres have been cultivated.

For further particulars and conditions of sale, apply to PORTER & NAISMITH, 301 Grain Exchange Building, Calgary, Alberta.

Dated at Calgary, in the Province of Alberta, this 25th day of June, A. D. 1928.

PORTER & NAISMITH, Vendor's Solicitors.

Approved W. FORBES, Registrar.
